

LUCID COIN

LUCID COIN

Dream Your Future

Lucid Coin brings an entirely new experience for participating in the crypto market. You don't need to understand technical details or play a computer game. All you need to do is sleep, just like you do every night.

Here, it is simple:

YOUR DREAMS CAN WIN YOU MONEY.

The experience of Lucid Coin has been designed to mimic the experience of a lucid dream. Within a lucid dream, the dreamer wakes up to the dream itself. Not only do they gain awareness, they also gain the power to influence their dream reality. This is what Lucid Coin is about - harnessing this power of belief and using it to create financial liberation for its community and investors

Lucid dreaming offers us a state of **LIBERATION** from the tunnel vision of what we think is possible. Because in a lucid dream, whatever we **believe** is possible **is** possible. Lucid Coin is an experiment to see what happens when a community becomes lucid to the fact that just like in dreams, our beliefs create our reality, and through collective belief use this channel for financial abundance.

THE MISSION: **REALIZE & MATERIALIZE**

Lucid Coin's mission is simple:
MAKE DREAMS COME TRUE.

Here is How:

- Encourage the world as individuals to recognize the potential held within dream experiences.
- Offer engagement, education, and resources centered around the concept of dreaming to enhance both waking and dream realities.
- Provide the collective a course of action to directly invest in dream potential.
- Turn dreams into money.

EVERYONE DREAMS^[1] but not everyone is aware of the potential available within the dream space. Lucid Coin's mission is to enable both individuals and the collective to maximize that potential.

How LUCID COIN is Different: Unique Value Proposition

Lucid Coin is supported by an engaged community which strengthens the purpose of the coin's existence. The center of engagement will be monthly **Precognitive Dreaming Competitions**. Competition prize winnings will directly correlate with the transaction volume of Lucid Coin during the month prior.

***THE MORE ACTIVITY,
THE LARGER THE PRIZE POT.***

To participate and have a chance to win, competitors must be active holders of LUCID tokens. The competition cycles will encourage investors to hold on to the coin, discouraging the rapid turbulence in price other coins face. Competitions are not mandatory; merely a perk of having Lucid Coin in your wallet.

COMMUNITY ECOSYSTEM:

Share Dreams, Win Money

Monthly Precognitive Dreaming Competitions are foundational to the Lucid Coin ecosystem, testing whether dreamers can access future information through dreaming and rewarding them when they do. Basically, people are going to try to see an image in their dream that hasn't been picked yet. When they do, they win LUCID tokens.

Below is a basic framework for how the competitions will be structured.

Competition specific details will be communicated prior to each cycle.

- Competition participants will submit a visual representation of their dream during a specified time frame.
- After all dreams are submitted, an image will be chosen at random from a preselected pool of target images.
- The selected image will be revealed to the community who will then vote on which submitted dream most closely matches the target image.
- Winner(s) will receive LUCID Tokens and NFT trophies.

**IT IS POSSIBLE TO DREAM OF AN IMAGE THAT
HASN'T BEEN PICKED YET. [2]**

Beyond the precognitive dreaming competitions, the community will determine the future of Lucid Coin. These developments could include engagements like Dream Summits, Dreamwork Academies, and/or a Dream Sharing Social Media platform. The options are as endless as the possibilities in a dream.

LUCID TOKEN UTILITY

LUCID token is the core asset of the Lucid Coin ecosystem, supporting an active, fair and self-sustaining ecosystem.

Competition Participation

There are two requirements for participating in Precognitive Dreaming competitions. First, participants must be active LUCID token holders of a minimum threshold. Second, each competition will require a nominal LUCID token buy-in. Token-gated competitions ensure that participation is limited to engaged community members, prevent manipulation and maintain fairness by discouraging over-submission from a minority of participants.

Voting on Competitions & Community Measures

Community voting on Precognitive Dreaming competitions, ecosystem development and community initiatives will be open to LUCID token holders above a minimum threshold. (See Technology)

Rewards for Competitions and Future Initiatives

Winners of the Precognitive Dreaming Competition will receive LUCID tokens as rewards. As the ecosystem grows, additional features may be introduced to provide further utility. These could include rewarding contributors, educators and aids in academies or summits, or rewarding active participants in a future dream sharing platform.

TOKENOMICS

Building and Sustaining Value

Lucid Coin's tokenomics are structured to minimize inflation and lock in price gains. At the heart of this approach is a buy and sell fee designed to steadily remove tokens from circulation. A portion of these tokens will be sent to the liquidity pool and then burned.

By constantly adding to the liquidity pool and burning the tokens sent, liquidity becomes increasingly deep and permanently locked. This **token-sink** design secures price gains and enhances price stability over time.

Low inflation will be achieved by dynamically adjusting token emissions based on the previous month's transaction volume. This ensures that new token supply aligns with the amount burned through buy and sell fees. Not only does this approach create a stable circulating supply but also leverages **deflationary mechanics** to sustain long-term scarcity and support the economic health of the ecosystem.

Token Supply & Fees

- **Total LUCID at TGE:** 88,800,000
- **Buy & Sell Fee:** 2.22%
- **Sent to Liquidity Pool & Burned:** 1.11%

TOKEN ALLOCATIONS

The allocation of LUCID tokens is structured to support the long-term growth of the ecosystem, ensuring that liquidity, community rewards, development, and strategic initiatives are well-funded.

Community Rewards (21%)

Distributed as prizes and rewards for active participation

Liquidity (21%)

Reserved for DEXs and CEXs to ensure robust market liquidity

Treasury (21%)

Covers operational costs and overall ecosystem development

Airdrops (9%)

Allocated to further reward to competition participants

Team (9%)

Allocated to contributors driving Lucid Coin's vision

Marketing (9%)

Used for advertising, promotional partnerships, and content creation

Charity & Research (5%)

Dreaming a brighter future by funding charities, dream-based education and scientific research

Listings & Partnership (5%)

Allocated for exchange listing fees and strategic partnerships

TECHNOLOGY

Lucid Coin operates on the **Base** blockchain, an Ethereum Layer 2 blockchain chosen for its low transaction costs, fast settlement times and Ethereum-grade security. A connected Ethereum compatible wallet enables seamless participation, serving as the gateway to Lucid Coin's ecosystem.

VOTING SYSTEM

Lucid Coin's voting system is designed to be secure, efficient, and transparent.

How It Works:

1. Token-Gated Wallet Verification

Users connect their Ethereum compatible wallet and the system verifies their LUCID token balance. If the balance meets the required threshold, voting access is granted.

2. Off-Chain Vote Collection & Signing

Users sign their vote using their wallet. Votes are stored securely using a decentralized storage solution.

3. On-Chain Vote Finalization

At the end of the voting period, the total results are hashed and recorded on the Base blockchain. A cryptographic proof, such as a Merkle root, ensures vote integrity and verifiability.

SECURITY & FAIRNESS MEASURES

- **Capped Votes Per Wallet** – Limits the number of votes per participant to maintain fairness.
- **Transparent Public Results** – Final vote tallies are recorded on-chain for full visibility.
- **Anti-Sybil Protections** – Wallet-based authentication prevents bot manipulation.
- **Decentralized Record-Keeping** – Ensures vote integrity without centralized control.

Dream Ethics Statement

Lucid Coin is committed to fostering a respectful, safe, and inclusive environment where dream sharing interactions maintain integrity and mutual respect by recognizing the ethics framework established by the International Association for the Study of Dreams.^[3]

NOTES

- [1] Even if you have never remembered a dream in your life, you still dream. You just don't remember your dreams. For a scientific study on this topic read:

Herlin, B., Leu-Semenescu, S., Chaumereuil, C., & Arnulf, I. (2015). Evidence that non-dreamers do dream: a REM sleep behaviour disorder model. *Journal of Sleep Research*, 24(6), 602–609.
